(54) ORGANIC ELECTROLUMINESCENT ELEMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an organic electroluminescent element capable of making an organic electroluminescent display see-through and increasing the size thereof at low cost.

SOLUTION: This organic electroluminescent element has a transparent substrate 1, a transparent positive electrode 2, a luminescent layer (organic layer) 3 and a transparent negative electrode 4. The positive electrode 2 and the negative electrode 4 each comprise a thin metal film and a thin metal oxide film.

- 1 : 透明基板
- 2 : 透明陽極電極
- 3 : 発光層
- 4 : 透明陰極電極

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
